

INFOVALLEY INNOVATES HEALTH & WEALTH

INFOVALLEY Group of Companies aspires to be a technology powerhouse in life sciences with the vision of attaining global recognition and the mission of being business leader in Asia. The recent restructuring with the establishment of business headquarters in London, offices in Dubai, apart from its presence in Kuala Lumpur and Bangalore is in line with its plan to go global. The Group has two major business thrusts, bio-molecular diagnostics and advance medical informatics. We are inviting candidates with the right attitude and aptitude to join our exciting international team.

BIO-MOLECULAR DIAGNOSTICS

Chief Operating Officer

Responsibilities:

- Lead the business and operational unit
- Strategic management of business, science and technology
- Internal and external relationship management

Requirements:

- Minimum Masters Degree in a bio-scientific field and/or
- 10 years experiences in bio-scientific management
- Natural leader and good attitude – aptitude for learning
- Management experience in knowledge intensive field

Head Of Molecular Science

Responsibilities:

- Leadership by developing policies, procedures, objectives and goals
- Manage molecular research & services laboratory
- Plan R&D portfolio
- Scientific publications

Requirements:

- Minimum PhD in molecular biology, genetics and/or specialized life sciences
- Minimum 5 years experiences in molecular research work

Marketing Executives

Responsibilities:

- Creation of awareness, promotion and education of public, healthcare practitioners and medical regulators
- Devise strategic marketing campaign
- Support sales and customer relationship unit

Requirements:

- Minimum Bachelors in marketing, business management or administration and/or
- 5 years strategic marketing experience in healthcare industry
- Good communicator and writer

Sales Executives

Responsibilities:

- Sales planning and execution
- Customer liaison and relationship
- Personalized customer education and promotion

Requirements:

- Minimum Bachelors in sales, marketing, business management or administration and/or
- 5 years sales experience in healthcare industry
- Good communicator and sociable personality

Biostatistician

Responsibilities:

- Participate in R&D design, experimentation and documentation of scientific work
- Training of scientific and technology team in biostatistics skills

Requirement

- Minimum Bachelors Degree, Masters preferred in Statistics
- 3 years experience in applied research including experience in study design, data management and analysis of large datasets.
- Knowledge of data analysis in a range of statistical software

Clinical Research Scientists

Responsibilities

- Translation of R&D findings into clinical applications
- Liaison with healthcare practitioners in dissemination of knowledge
- Participate in clinical research and support.

Requirements:

- MBBS, PhD and/or Masters in bio-molecular field
- 2 years of clinical working experience
- Good written and spoken communication skills

Genetic Counselor

Responsibilities

- Liaison between product portfolio unit, healthcare practitioners and public
- Translation of molecular knowledge to clinical meanings
- Participate in marketing, sales support and customer relationship management

Requirements:

- Minimum Masters Degree in bio-scientific field, preferably molecular biology
- 3 years of experience in clinical environment
- Knowledge of molecular application in clinical practice
- Good written and spoken communication skills

Forensic Medicine Scientists

Responsibilities

- Actively participate and support R&D
- Translation of technological values into products and solution
- Scientific and technical documentation as per international guidelines and standards
- Internal and external liaison inclusive of customers

Requirements:

- Minimum Bachelors Degree in forensic medicine or pathology or anatomy preferably MBBS
- Basic ICT knowledge and work experience.
- Forensic autopsy and medico-legal knowledge
- Good written and spoken communication skills

ADVANCE MEDICAL INFORMATICS

Project Managers

Responsibilities

- Management and administration of software development
- Project planning, CMMI & ISO documentation
- Scientific, technology and managerial study to determine feasibility, cost and time

Requirements:

- Minimum Bachelors Degree in ICT
- 5 years experience in OOP programming and analysis
- Minimum 3 years of RUP(EUP) software project management
- Good written and spoken communication skills

Biomedical Engineers

Responsibilities

- Developing C++ applications based on specific scientific instruments
- Participate in the design, development of code modules and performing code reviews.

Requirements:

- Minimum Bachelors Degree in biomedical engineering
- 3 years of experience in the medical imaging, spectrum analysis and laboratory equipment
- Knowledgeable in C++/VC++

GUI/Web Designers

Responsibilities

- Participate in the development of software solution
- Provide overall input and creation of GUIs and graphics
- Merge multiple media input with the aim to create impactful graphical output

Requirements:

- Bachelors Degree in multimedia, graphic and/or animation
- 2 years as a graphic designer and/or
- Impressive and demonstrable portfolio of work

C++/C# Programmers

Responsibilities

- Developing C++ applications in imaging and visualization
- Participating in design, development of code modules and performing code reviews.

Requirements:

- Minimum Bachelors Degree, preferably in computer science or related discipline.
- 3 years of experience in the C++ and C#.net programming with good experience in imaging and image processing

Network Engineers

Responsibilities

- Management and administration of both internal and external ICT environment
- Systems performance analysis and recommendations

Requirements:

- Minimum Bachelors Degree, in Computer Science
- 3 years experience in high performance computing
- Experienced in email servers, VOIP and wireless systems
- Exposure to Linux/Windows 2K Server/ Windows 2003
- Exposure in tiered architecture system

Web Administrators

Responsibilities

- Management and administration of all ICT based communication systems
- Liaison between business, scientific and technology unit for content development and Management

Responsibilities:

- Minimum Bachelors Degree in Computer Science
- 2 years of experience in development and maintenance of web portals

System Analysts

Responsibilities

- Collect information to analyze and evaluate existing or proposed systems.
- Prepare detailed flow charts and diagrams outlining systems capabilities and processes.
- Model the new system or re-model the previous systems and UML or other modelling languages for the best performance for meeting the requirements.

Requirements:

- Minimum Bachelor's Degree
- 3 years of OOP programming and/or system analysis
- Applied experience in UML modelling and RUP

INFOVALLEY is reputed for talent development. Although experience is much appreciated, fresh graduates with passion and desire to take up greater challenges are encouraged to apply where applicable. Please submit a comprehensive resume detailing work experience, current and expected salary together with a passport-size photograph before **23rd of January 2011** to:
